DETAILED ACTION

STATUS

Claims 1-58 and 217-224 are pending.

Response to Arguments

The Applicant's arguments filed on March 4, 2005 have been fully considered. The Examiner states that appended claims 221-223 as well as original claim 217 are drawn towards different inventions.

See following rejection.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-58, and 224 are drawn to usage protection of distributed data files, classified in class 705 subclass 51.
 - II. Claims 217-223 are drawn to a computer graphics display with memory, classified in class 345 subclass 530.

Inventions I, and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in invention II does not require the particulars of the subcombination as claimed in invention I such as a processor ID and a local authorization code which allows the signal to be decrypted for viewing.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
